# FESTIVIA

## SET-4

By: - Sachin Kr. Singh

Hi,

In this assignment, you will implement The landing page of a website in two parts

Background changes its colour like a rainbow every second. (LINK1)

A Card Slider. (LINK2)

**LINK WILL BE PROVIDED FOR THE REFERENCE.**

- The landing page of the website would feature a Neon Light effect Background Image. And it should complete its colour changing cycle after a specified time (Let it be 8sec)
- For the Card Slider you have to Make a Simple don't put much effort in designing it, Focus more on JavaScript implementation where you have to make it slide in Horizontal Direction, either Left or Right.

Some recommendations/suggestions:

- Use of modern JS is preferred. If you are new to them, learning and implementing this assignment is recommended.
- Please clean-up your code and explain your logic in comments for easy understanding at our end.
- Please provide a procedure to execute your program along with details of any libraries you might be using.
- A brief documentation (even in a single page!) of your work would be great.

The description of the task is intentionally kept minimal to give you room for imagination. Please try to make the website as functional and useful as possible.

Deadline for Assignment Submission: Saturday 23rd January 2021.
